RPA STAFF RECOMMENDATION

Case Number: 2013-045 **PC Meeting Date:** 4-8-2013

STAFF RECOMMENDATION: APPROVE

**Land Use & Transportation
Comments**

Planning Staff:

Applicant Request Overview
 The applicant, John Wise, proposes rezoning 0.79 acres located at 530 Cherokee Boulevard and 335 Stringer Street from R-1 Residential, C-2 Convenience Commercial and O-1 Office Zones to C-7 North Shore Commercial/Mixed Use Zone for a new mixed use development of office space and apartments.

Site Description
 The property has one abandoned building on site. Adjacent uses include residential uses to the north and east, manufacturing and institutional uses to the west, and office and commercial uses to the south.

Plans/Policies
 The following is a synopsis of policies and plan recommendations for the portion of the North Chattanooga community in which the proposed rezoning is located:

Comprehensive Plan
 Although there are no specific references to this site, the Hamilton County Comprehensive Plan 2030 provides general guidance on appropriate future development types, land use patterns, and physical form by Development Sectors. The Plan identifies this site as part of the Urban Growth Sector. Urban areas typically offer dense development of a variety of uses. The more compact form dictates an integration of land uses. Almost without exception, these areas receive full municipal services such as sewer, sidewalks, bike facilities, and public transit. Due to the high level of land use integration, careful attention and planning is necessary to ensure development compatibility in terms of scale and impact.

- Small lots (5,000-7,500 sq. ft.)
- High number of structures per acre
- Grid / Modified Grid street network
- Sidewalks prevalent
- Public transportation and bicycle networks
- Mix of residential and non-residential uses in close proximity
- Average Residential Density: 6.5 Dwelling Units / Acre

Adopted Plan: North Shore Plan (2007)
 The 2007 North Shore Area Plan created with substantial public involvement provides more specific planning policies and land use recommendations for the area of this proposed development. The North Shore Development Plan has specific, implementable urban design and development recommendations for the enhancement of

RPA STAFF RECOMMENDATION

Chattanooga's North Shore.

The principles identified for land use are as follows:

- Promote development that demonstrates excellence in design and that enhances the character of the North Shore
- Encourage a harmonious mix of uses
- Protect and promote the unique character and identity of the North Shore
- Provide a diversity of transportation options
- Provide intelligent parking solutions that balance the needs of automobile and pedestrian
- Expand the system of pedestrian and bicycle facilities
- Enhance connectivity within and between the North Shore, downtown, and Moccasin Bend
- Provide a public realm that is safe, vibrant, and evokes a sense of place
- Protect the natural assets and public viewsheds of the North Shore
- Respect the right of existing uses to continue operations.

Generally, a conventional land use plan provides a series of land use classifications that provide guidance for future development, redevelopment, and preservation of an area. However, the North Shore Plan includes a development form plan which covers such factors as building height, setbacks, and massing; orientation; parking, curb cuts and driveway connections; landscaping; streetscaping and street furniture; and other factors.

The property in question falls within the Medium-Intensity Mixed-Use category. This development form is for medium-intensity mixed-uses with building footprints smaller than 10,000 square feet, and for buildings of less relative scale than those of the high-intensity form. Uses should be oriented towards the pedestrian rather than the automobile with the orientation of pedestrian entries to the primary streets. Parking should be placed to the rear when possible. This form can be located adjacent to low-density residential uses.

C-7 Zone Overview

The C-7 North Shore Commercial/Mixed-Use Zone is unique in Chattanooga and is only present on the North Shore within the plan study area. The C-7 zone was initiated to maintain urban commercial and mixed-use development in an area of Chattanooga that is inherently urban. The zone was placed along Frazier Avenue and portions of Cherokee Boulevard, North Market Street, and Tremont Street in order to maintain and promote urban development, characterized by buildings built to the street, with parking located to

RPA STAFF RECOMMENDATION

the rear. The goals of the C-7 zone are:

- Promote a mix of uses within the North Shore Commercial Zone
- Allow greater latitude in design than what is provided for by existing zoning requirements
- Encourage investment in the Zone
- Bring most daily activities within walking distance, giving the elderly and the young increased independence of movement
- Reduce the number and length of automobile trips, to minimize traffic congestion, road construction and air pollution
- Establish building densities that support the use of transit
- Provide quality public spaces such as streets, sidewalks, parks and squares
- Provide a full range of housing types and workplaces that will integrate age and economic class
- Maximize the use of all existing resources including land, buildings, parking, and infrastructure
- Maintain the physical continuity of the street edge created by multi-story buildings built to the sidewalk
- Protect the viewshed and scenic vistas both from the North Shore and of the North Shore from other areas
- Promote pedestrian activity and safety

The C-7 zone is an important redevelopment tool. The zone's design principles provide robust guidance for those engaged in development or redevelopment, allowing the community a voice in changes on the North Shore. The need for contiguity of C-7 zoning was recently removed from the ordinance.

Staff Recommendation

The Regional Planning Agency recommends approval of this rezoning request as the applicant's proposed use was found to meet the intent of adopted area plans and policies. Conditions have been recommended by staff to help ensure the development is compliant with regulations of the City's Traffic Engineering and Land Development Offices. Approval of the C-7 rezoning request with the associated design review process will ensure the development's compatibility with the surrounding area.

Infrastructure & Operational Comments

Public Works Staff:

All land development projects are reviewed by City Engineering & Water Quality staff, Traffic Engineering & Operations staff, and the Land Development Office staff. In addition to the requirements of the City of Chattanooga Zoning Ordinance, all land development is further required to comply with current City of Chattanooga traffic regulations, building and development codes, storm water/water quality regulations, and the landscape ordinance.

RPA STAFF RECOMMENDATION

Additional requirements, if needed, are indicated by department below either as comments or as conditions recommended to be attached to the final ordinance.

Water Quality

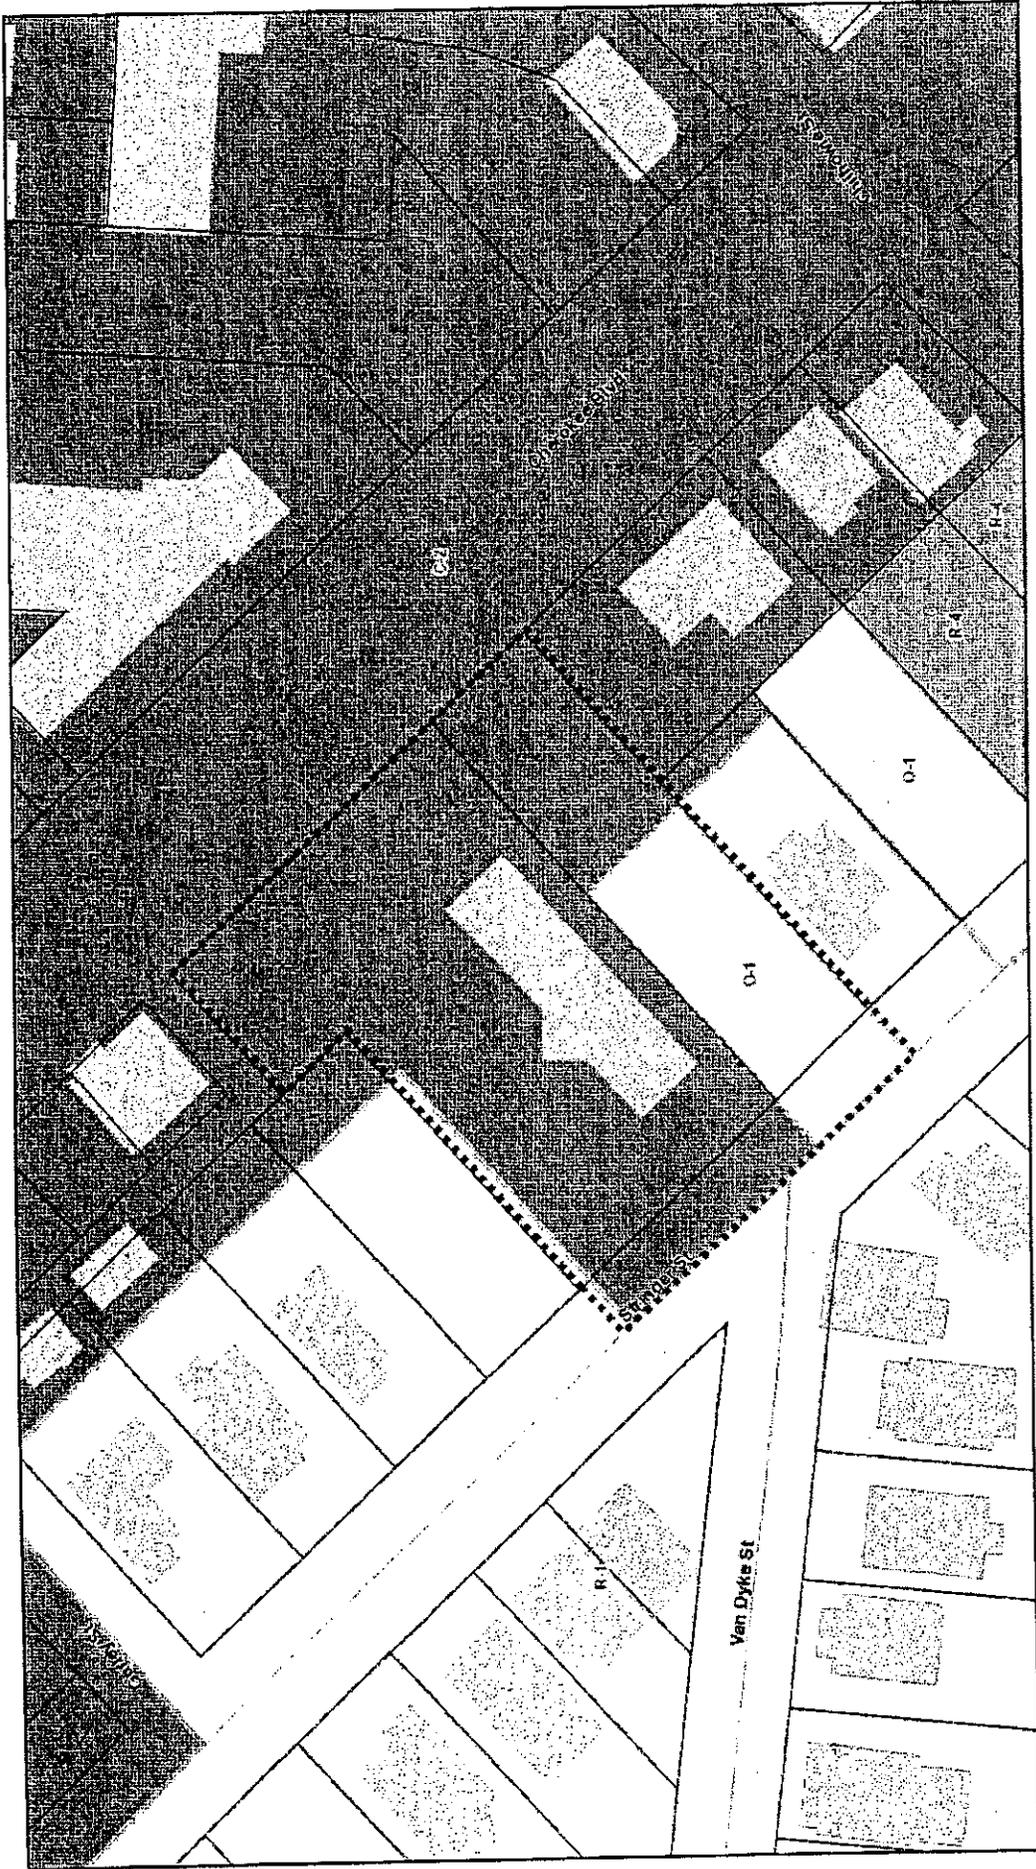

Developer will need to submit a retention plan before permitting. Call 643-5877 for more information.

Traffic Engineering & Operations

The driveways on Stringer Street are substandard and will need to be at least 30'. Call 643-5950 for more information.

Land Development Office

The existing 20' buffer between O-1/ R-1 will not meet the buffer requirements for R-1/ C-7. Call 643-5800 for more information.
