### **SURFACE PREPARATION**

Prior to application, the existing surface must be thoroughly clean, sound, dry, and free of oils and other bond inhibiting contaminants. Spalls, delaminations, potholes, scaling, pop outs, and other defects in the substrate must be repaired and all projections must be leveled prior to the commencement of the installation. Pressure washing is required to remove any mildew. Special attention should be paid to court #12.

Once the surface has been thoroughly cleaned and is free of all loose material, dirt, or dust, the court should be flooded and allowed to drain a minimum of 30 minutes and a maximum of 1 hour. Any area that holds water (birdbaths) in a depth greater than 1/16 inch (1.6 mm) (thickness of a nickel) shall be outlined and patched.

Surface Leveling: Birdbaths shall be leveled using LAYKOLD Deep Patch. Prime area to be patched with a 50/50 mixture of Deep Patch and water. Primer shall be brushed into place and allowed to dry prior to patching. Patch mix shall consist of LAYKOLD Deep Patch, 50-mesh sand and Portland Cement. Mix as per manufacturer directions.

Crack Filling: Cracks shall be cleaned, primed, and filled using LAYKOLD Acrylic Resurfacer if cracks are 1/16 inch or less. If greater than 1/16 inch, LAYKOLD Deep Patch mix should be used to fill cracks. Refer to LAYKOLD Deep Patch technical Data sheet for additional details filling various sized cracks. Once the cracks are filled they will be covered with a 30 mil waterproof tape then smoothed with surface materials to blend in the transition.

Special attention should be paid to cracks on courts #5-6, 7-8, 12-13, and the practice wall footer.

### **TEXTURED COLOR COATS (2 layers)**

Apply two coats of LAYKOLD ColorCoat Concentrate textured mixture. Batch mix shall consist of 55 gallons (260 kg) of ColorCoat Concentrate, 45 gallons (170 kg) of potable water, and 450 pounds (204 kg) of clean, bagged silica sand (70 to 100 mesh). The application rate shall be 0.04-0.05 gal/yd<sup>2</sup> (0.23-0.29 kg/m<sup>2</sup> - 180-225 fl/gal) of undiluted ColorCoat Concentrate per coat. Each layer should be completely dry before applying subsequent layers. Apply colorcoat to all asphalt outside the fencing.

### **GAME LINES (3 coats)**

Layout lines and tape off using masking tape. Apply one coat of clear tape sealant. Apply two coats of Textured White Line Paint as needed. All lines are to be applied by painting between masking tape according to U.S.T.A. specifications. Remove masking tape immediately after lines are dry. Lines must be straight and have clean, sharp edges. If lines are inaccurate or not straight they will be done over. Paint USTA "quick-start" 10-U lines on courts 15-18.

### **CLEAN UP**

All trash and excess materials will be removed from site. Net posts will be repainted and nets hung to proper height.

### **LIMITATIONS**

- Do not apply over damp or wet substrates.
- Do not apply to surfaces during the out-gassing of vapor.
- Minimum application and curing temperature 50°F.
- Maximum substrate temperature 120°F.
- Minimum cure time for asphalt and concrete substrates is 30 days.
- Maximum moisture content of substrate is 4%.
- Do not apply during inclement weather or when it is anticipated
