Relevant Saint Elmo Guidelines:
Case # HZ-20-108 . 5501 Alabama Avenue

Page 41. Section 6.9. Design Guidelines: Driveways and Paving
A. Of primary buildings should maintain, not disrupt, the existing pattern of surrounding historic buildings along the street by being similar in:
   1. Shape
   2. Scale (height and width)
   3. Roof shape and pitch
   4. Orientation to the street
   5. Location and proportion of porches, entrances, windows, and divisional bays
   6. Foundation height
   7. Floor-to-ceiling heights
   8. Porch height and depth
   9. Material and material color (foundations, brick/frame dwellings, windows)
   10. Details and texture
   11. Placement on the Lot
B. Of primary buildings, while blending in with adjacent buildings, should not be too imitative of historic styles so that new buildings can distinguished from historic buildings.

Page 67. Section 6.32. Design Guidelines: Sidewalks and Walkways
Elements Consistent with Guidelines:
Driveway,
Parking pad,
Walkway, and
Retaining wall(s).

Recommended Application Clarification or Changes:

Building, New Construction:

In the following sections of the “Building, New Construction” Saint Elmo Guidelines, the submitted plans are inconsistent with the Guidelines. Please clarify these inconsistencies and answer the following questions:

The Guidelines state: “Of primary buildings should maintain, not disrupt, the existing pattern of surrounding historic buildings along the street by being similar in”:

2. Scale (height and width) - This area of St Elmo has predominantly one and a half story structures. This property is on an elevation higher than across the street. This structure appears to have two stories visible from Alabama Avenue and over 3 feet of foundation. Can the proposed structure’s height be reduced to be more in keeping with height of surrounding structures?

6. Foundation height - The foundation height at the front of the structure appears to be over 3 feet. Why is the foundation height proposed to exceed the foundation height range specified in the Guidelines? Per page 54, “Height of foundations should be a minimum of 1 foot, six inches and a maximum of two feet above grade”.
